

NEXT

Zayyan Budiman, IDS 305-B Fall 2023

Next aims to create a space that is both functional and visually stimulating in order to inspire their employees. The primary colors red, yellow and blue will be used in both bright and darker tones, with creamy whites and wood tones being used to naturalize the palette. Using vintage board and card games as inspiration, NEXT will provide a vitalizing and fun environment their employees will want to work in.

Puzzles and board games are readily available for employees to relieve stress and bond with their coworkers. The shelf wall both displays and stores the games and puzzles, with an abundance of space for an expansive company collection.

Stacked rectangles and squares create this pattern seen all throughout the space. The pattern exhibits NEXT's goals and design concept of puzzles and board games.
